

ECO-SOUND™ BLAZEMASTER™

For a quieter fire safe work environment.

ECO-SOUND™ BLAZEMASTER™

**A multi-purpose solution to noise reduction
and fire safety in the workplace.**

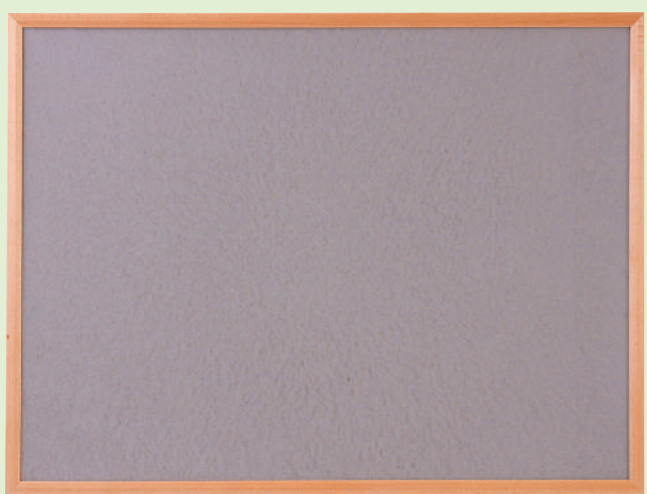

Adboards new and exclusive Eco-Sound™ Blazemaster™ noticeboards are made from 100% recycled PET with fire resistant and acoustic properties, making this noticeboard ideal for use within busy public spaces, learning, office and general working environments.

Eco-Sound™ Blazemaster™ notice boards are self-coloured pinnable boards made from recycled and recyclable materials and are available in a choice of 14 colours to accommodate any environment. As part of our Blazemaster™ range, these products have been independently tested and classified as Class B according to European Reaction to Fire Test BS EN 13501-1 Class B to meet public area building regulations for mounting in sensitive areas such as corridors, stairways and entrances.

Under laboratory conditions, Adboards Eco-Sound™ Blazemaster™ noticeboard products can achieve an NRC (Noise Reduction Coefficient) rating up to an impressive 0.8 and are fully certified to BS EN ISO 11654: 1997 Class E. These noticeboards aid the reduction of noise transfer in busy environments. An acoustic wall feature can be created by mounting these frameless boards side by side. Easy through the board portrait or landscape wall mounting with fixings is provided.

Eco-Sound™ Unframed Noticeboard

These frameless Eco-Sound™ noticeboards can be installed on walls and ceilings, in office furniture systems, as decorative tiles and even finished products. The big advantage with the unframed boards is that several boards can be grouped side by side to cover a larger area, particularly useful in environments where noise is higher, and they can be mounted either portrait or landscape format.

These are the most cost-effective product in the range, and once mounted to the wall give an appearance of clean lines and crisp corners and are easy to fit with a wall fixing kit supplied.

- Flame retardant to BS EN ISO 13501 Class B
- Soundproof to BS EN ISO 11654:1997 Class E
- Simple, neat and clean appearance
- Able to cover larger area by grouping boards
- 100% recycled PET
- Fixing kit supplied
