Our Services

Site Survey (Free of charge service)

To help with the buying process, we would be delighted to arrange a free site survey. Your dedicated Account Manager will visit you to discuss your requirements and take the necessary measurements.

This information will then be discussed between your Account Manager and our Product Design Engineers to produce layout plans.

3D Space Planning (Free of charge service)

One of the most important services we provide to our customers is delivering detailed, aesthetic designs of cafeteria/dining room layouts. To produce these, we employ qualified Product Design Engineers who are experts in creating bespoke dining solutions and space plans.

These designs are produced using modern 3D CAD (computer aided design) programmes to give a detailed idea of how the environment will look and feel. Using sophisticated modern 3D CAD engineering software, structural and finite element analysis is performed on all new designs to ensure that the most efficient and high performing solution is provided. These efforts result in high quality products at great value prices that our customers trust and that we are proud of.

3D space plan for 14 x 12 seat rectangular and 12 x 8 seat round tables
