HEALTHCARE

VISCOM PRODUCTS FOR MEDICAL APPLICATIONS

PROTECTED PRODUCTS AGAINST MICROBES

CERTAIN ENVIRONMENTS, SUCH AS CLINICS, LABORATORIES AND HOSPITALS, REQUIRE SPECIFIC PRODUCTS FREE FROM BACTERIA, GERMS AND MICROBES.

WHY WE USE IT?

BioCote Technology additive actively cleans all surfaces, as whiteboards and cork boards, inhibiting the bacteria to reproduce. We implemented a performance test to prove the hygiene benefits of our products in a real life situation, using BioCote Technology. Data collected showed that all products had a significant bacteria reduction of 99%.

- 1 Doesn't wear off or wash away
- 2 Achieves a reduction in surface microbes levels
- 3 Provides an important second layer of defence
- 4 Reduces the risk of spreading harmful micro-organisms
- 5 Helps health procedures against infectious agents
