

Airflake

Airflake is a sound absorbing screen made from moulded fiber felt. Design Stefan Borselius. This modular system is built around the shape of a hexagon in a variety of designs and colours which can be freely combined to create the screen. Airflake is fixed to a straight or angled aluminium rail for mounting on wall or to ceiling. Airflake can also be fixed directly to the wall.

When placing an order of minimum 200 modules (20 x 10-pack), you have the possibility to choose other colours from Gabriel Europost fabric (15% upcharge).

Please enter www.abstracta.se to use the Airflake configurator tool!

Moulded fiber felt panels in seven colours and four patterns. 10-pack contains: 10 panels, 5 attachments, 10 pairs of short and 20 pairs of long plastic clips. Measurements 400 x 360 mm.

Description	Art no	W x H mm	Weight
